----------------	-------------

Description

Add ability for content editor to add an end time. The end time will always have the same end date as the start date, so it would make sense for the end data to auto-populate or not be required. The end time should appear near the start time. Example: Thursday, June 4, 2015 | 11 am - 4:30 pm

Comments

Comment by [Web Admin \[Administrator\]](#) [24/Jun/15]

Steps to make this change:

1. Create new date time field with end time
2. Modify view to include new field
3. Remove old field from view
4. In view, edit the new field to hide the label and:
5. Rewrite display to include this: [title]: [field_cf_event_start_end_time] and check "Output field as link" and make Link Path: [path]
6. Arrange fields so new data time field appears at top in view
7. Modify display of fields for content node so new field appears at top
8. Hide old field from display

9. Hide label of new field

This issue also occurs for Bunker Hill.

Comment by [Web Admin \[Administrator\]](#) [25/Jun/15]

Michael, Neil also found that the address for the Santee Court brochure was incorrect and did not match the property. The address on the property page is correct. While you are looking at the brochure code can you investigate why the address doesn't match?

Thanks,

Comment by [Michael Sharps](#) [25/Jun/15]

I fixed the addresses. It was pulling from the Yardi properties table and I modified the code so it is pulling from the content node.

[EWS-90] [Keep floor plan tabs expanded when users adjust their move in date.](#)

Description

Currently, when adjusting the move-in date in the floor plans section, any tabs the user has expanded(Studio/1Bath, 1Bed/1Bath etc.) automatically close. Allowing the tabs to stay expanded upon changing the move-in date will allow users to more easily recall which floor plans they were looking at, and will also enhance visual cues, making it more obvious that the availability of certain floor plans has changed.

[EWS-62] Need to find a way to place a Commercial (retail) link to the footer of the site. The link will go to essexretailspace.com. We can add the link via the menu console but footer links will probably need to wrap at a certain point to keep a balanced look. Created: 22/May/15 Updated: 23/Jun/15 Resolved: 23/Jun/15

Description

Add a link to <http://essexretailspace.com/> on the bottom nav, called "Commercial Space" positioned between "Privacy Policy" and "Communities".

Update 5/19/2015: We need to design it so there are two rows for footer elements

Description

User reports being disjaring experience when you have 14 properties in display results and you filter based on price then your point of reference goes away.

Comments

Comment by [Michael Sharps](#) [15/Jun/15]

Map should maintain initial boundaries after search filtering.

Comment by [Web Admin \[Administrator\]](#) [22/Jun/15]

Cancelled release of this item due to numerous new issues it caused with search. One issue is with filtering the results, if none exists in the area the fallback search kicks in. A scenario can be created where the fallback search will return a result that would not show up the map because the zoom would be limited.
