**Description**

Looks like we didn't account for specials when creating the Avant micro-site. Need to make a change so the site pulls from the specials in the content node. A design modification may be necessary but we could use the existing design for the text that shows over the photos.

**Comments**

Comment by [Michael Sharps](#) [ 13/Jul/15 ]

The "text over photos" are part of the image and not a text overlay. The images used for the current site were pulled from previous Avant website as directed and included one slide which had the special text overlay (see attachment). To use the specials from the content node, we need design direction as to where it should appear. If it is to appear over the slideshow, then marketing will need to provide the images without the text baked into the image so we can create a text overlay which will require a code modification.

Comment by [Michael Sharps](#) [ 16/Jul/15 ]

Added replacement rooftop image without specials text.

Comment by [Web Admin \[Administrator\]](#) [ 14/Jul/15 ]

Talked to Lorena from marketing and we have freedom to develop the site as a micro-site using our existing functionality.

- Get rid of social widgets like Instagram and twitter that appear on home page (we would just link to them as we do with other micro-sites)
- Get rid of "Get on list" form and just use a Contact page like other micro-sites
- There is a BMR page that we will need to retain somehow (<http://mossosf.com/bmr>) we could probably create a landing page for this
- Get rid of icon images in slider and just use property photos from SlideshowPro
- Buildings and Apartments pages will become Floor Plans page
- Amenities page will become Features & Amenities (bullet list of features and amenities is fine)
- Remove Chat link
- Can remove map from home page and use Neighborhood page with map widget
- Utilize existing Virtual Tours functionality - show styled icon layered over slideshow

TODO (as of 7/8):

Implement different home page background image provided by marketing (this is the image that displays after the video has completed). WAITING FOR IMAGE FROM MARKETING, BUT ADDED A NEW CANDIDATE IMAGE THAT SEEMS TO WORK WELL

Add rust color somewhere in the Specials footer so that it stands out more. DONE

Swap video and thumbnails on the Gallery page. DONE

Implement cookie so that video only plays once. Set cookie expiration to 7 days (my recommendation). DONE

Implement "Replay Video" so prospect has the ability to watch home page video again. DONE

Create responsive version of home page. IN PROGRESS

 Create on QA for testing but then put together mock-up of better solution.

Comment by [Web Admin \[Administrator\]](#) [ 09/Jul/15 ]  
 Some additional information....The two different mockups with different icons should both be used. One is the default icon for navigation on Apple devices and the other is for Android. These are not intended to be two different versions to test.
