#### Description

It appears that goal tracking stopped last Friday/Saturday. Could be due to the google analytics change: <http://screencast.com/t/xgl1pLZxQOB>

From Neil:

We also need to add tracking to the apply now button, there is an onclick even called `trackEvent('ApplyNow')`; could you give me the details of that function so I can set it up in GA?

**[EWS-120] [Neighborhood text: Import new copy and add link capability to feilds](#)**

### Description

Change to not allow native mobile app to open for directions has already been completed. Need to get CAB approval for this change. Users have reported problems with opening the native application. Let's explore if we can provide a link for those users who want to have the directions open in their native map application.

Associated with BR-238 for M7 and BR-238\_Mobile\_directions\_button branch

### Comments

Comment by [Web Admin \[Administrator\]](#) [ 26/Jun/15 ]

Update: 5/19/2015 to do more testing to see if we need to fix bugs (iphone always going to map website not app) or if we can just sent ppl to in-page directions.

Comment by [Web Admin \[Administrator\]](#) [ 26/Jun/15 ]

Update 5/27/2015 Google Consumer Survey Results(400 Responses): 73.8% prefer directions to be loaded within the site, not to be taken to a different site/app.

TODO (as of 7/8):

Implement different home page background image provided by marketing (this is the image that displays after the video has completed). WAITING FOR IMAGE FROM MARKETING, BUT ADDED A NEW CANDIDATE IMAGE THAT SEEMS TO WORK WELL

Add rust color somewhere in the Specials footer so that it stands out more. DONE

Swap video and thumbnails on the Gallery page. DONE

Implement cookie so that video only plays once. Set cookie expiration to 7 days (my recommendation). DONE

Implement "Replay Video" so prospect has the ability to watch home page video again. DONE

Create responsive version of home page. IN PROGRESS

Completion of this task is dependent on user testing. Marketing is testing whether we need to change the placement of the arrow throughout the site to avoid user friction.
