Description

Need to modify colors of <http://www.essexapartmenthomes.com/affordable-apartments-los-angeles> so they match the current colors of [essexapartmenthomes.com](http://www.essexapartmenthomes.com).

Also, need to change all occurrences BRE to Essex.

- footer to read "Essex 2015" for copyright
- Leading marketing copy (this may be in a content node)
-

Comments

Comment by [Web Admin \[Administrator\]](#) [29/Jul/15]

- Change colors to match styles of [essexapartmenthomes.com](http://www.essexapartmenthomes.com)
 - o Header (Can you provide a new header image with new "Affordable apartments..." text)? Yes- can you provide dimensions of the current banner?
 - o Footer-Grey
 - o Text and link text- teal blue content like website for the names of the property. All other text

can be black.

- o Background-color can stay white

- o Border-grey

- o Button- teal blue

- Change BRE to Essex

- o We will change the footer to show “Essex 2015” since this is a code change

- o The copy changes can be done through the “Affordable apartments in Los Angeles” content node in Drupal at any point in time.

- ♣ Use this url to access the content node:

<https://admin.essexapartmenthomes.com/node/206/edit?destination=admin/content-> We will make the necessary changes outside of “Essex 2015”, in content it also reads BRE but we will change on our end.

- Links can be added for each property via the content node and will appear below the marketing copy. See Radius as an example. This can be done by any marketing publisher with basic HTML knowledge.

- o Example of code: We offer affordable housing <a

href=<http://www.essexapartmenthomes.com/affordable-apartments-los-angeles>

target=”_blank”> Click here to learn more.-Since Neil was our person to do this we may need support from your team in this area for now.

*Note: We will need the new header image within the next few hours.- We can do this pretty quickly once we have dimensions.

Comment by [Web Admin \[Administrator\]](#) [29/Jul/15]

Brad - Please provide dimensions to marketing.

Comment by [Brad Thompson](#) [29/Jul/15]

current banner dimensions sent to Dave, lorena and marketing group.

Dimensions are 830 x 197

Comment by [Brad Thompson](#) [29/Jul/15]

Updated form with changes. created new css template and updated BMR template file with new image and essex information. Sent to Lorena for review.

Description

Getting 500 error on asp form. Need to track down issue and get back to ops to start mapping.

Comments

Comment by [Brad Thompson](#) [24/Jul/15]

I have emailed Paul from Gelb Group on two separate occasions to resolve the 500 server error. I have emailed Yardi and Client Services to get their opinion and to get access to knowledge base. Will email Geoffrey Gelb to escalate the issue.

Jami has been working with Paul on the customer Care dashboard loaded. They have been receiving the same 500 error with that. I have asked Jami to let me know what they find for a solution.

Comment by [Brad Thompson](#) [29/Jul/15]

Had a goto meeting with Paul and Dave. We through the code and did testing in essextest. Able to get part of the form up and going but would still error out. Paul is going to review the code today and tomorrow for a Friday morning meeting. I updated Donna with the new information. Dave will put in a request to have the file placed into LIVE once the form is working in test.

Talked to Lorena from marketing and we have freedom to develop the site as a micro-site using our existing functionality.

- Get rid of social widgets like Instagram and twitter that appear on home page (we would just link to them as we do with other micro-sites)
- Get rid of "Get on list" form and just use a Contact page like other micro-sites
- There is a BMR page that we will need to retain somehow (<http://mossosf.com/bmr>) we could probably create a landing page for this
- Get rid of icon images in slider and just use property photos from SlideshowPro
- Buildings and Apartments pages will become Floor Plans page
- Amenities page will become Features & Amenities (bullet list of features and amenities is fine)
- Remove Chat link
- Can remove map from home page and use Neighborhood page with map widget
- Utilize existing Virtual Tours functionality - show styled icon layered over slideshow

Comment by [Web Admin \[Administrator\]](#) [29/Jul/15]

Weform should send to submission to mosso@newhome1.com. I have made this change in QA

Comment by [Web Admin \[Administrator\]](#) [30/Jul/15]

Change LEASE TODAY! STOP BY OUR NEW NEW LEASING OFFICE AT 900 FOLSOM.
to LEASE TODAY! STOP BY OUR NEW LEASING OFFICE AT 900 FOLSOM.

Add **"In most apartment homes"** and **"*Select homes"**

	EWS-189	Document code process flow	Sub-task	In Progress	Michael Sharps
Sprint:	7/30 Sprint, 8/6/15 Sprint				

Description

Search revamp project will begin during this sprint. First phase is to go through and evaluate and clean up code (make it more readable), look for quick wins to make code more efficient and possibly improve search performance. Lastly, during this phase we will begin to evaluate best long term solution. Remove any legacy code from old web site.

Comments

Comment by [Web Admin \[Administrator\]](#) [21/Jul/15]

Example of search result issues:

Mobile/Geo-location

1. 1 Use Geo-locate to find properties near you. Than apply filter such as narrow results to 3 Beds. The search doesn't remember your location and will ask you to put in a new location.
2. 2 Type Cypress into search bar then filter to \$800 - Fountain Park At Play Vista shows with a rent range of \$2895 - \$3110. (not a great result but what should be returned here?)
3. 3 After taking the above step, type in Tracy in the search bar. The search remembers the community and redefines location at Tracy (Probably not what the user expects to happen)
- 4.

Comment by [Web Admin \[Administrator\]](#) [24/Jul/15]

Plan of attack:

- Michael will create a local branch in his local environment
- Document use cases for testing
- Run a benchmark performance test
- Begin to clean up code (includes removing any legacy BRE search code) (document process flow)
 - Look for opportunists to consolidate and encapsulate logic into functions for re-usablility and better readability and remove legacy code
- *Evaluate current queries and look for opportunities for optimization
- After code clean up we will test use cases against refactored code
- Benchmark new code and compare results

Estimated date for completion is 8/6.

Additional notes:

- Michael will look at using BrowserStack Selenium for testing

- Michael will begin documenting a process flow/logic that will result in a flowchart and decision tree

[EWS-67] Potential change the home page on mobile. 9 of 12 opted for search over geolocation feature, possible solution to create consistency with desktop, while still providing Geo option.
