

Setting up your new Maintenance iPad

Open the box your iPad came in, and power on the device by holding the power button on the top right until the screen turns on.

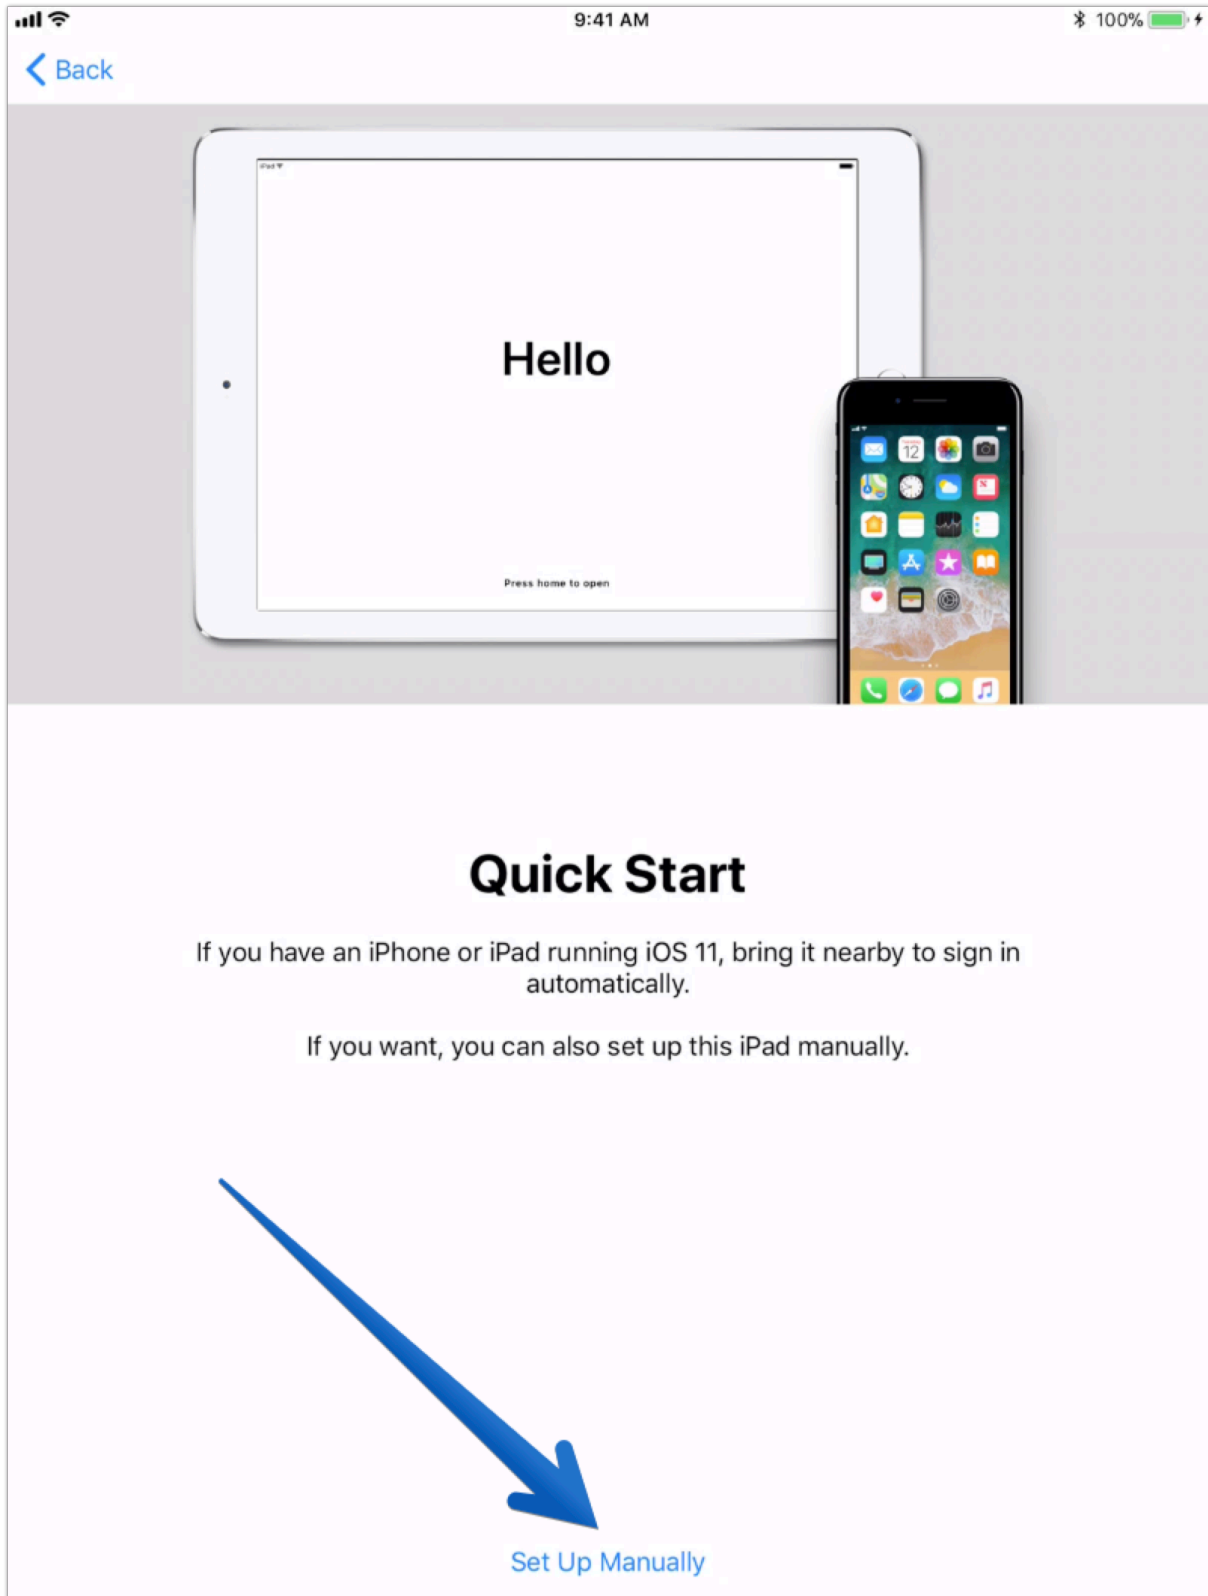

You'll see the Hello screen the first time you turn it on. Press the large "Home" button below the screen to begin.

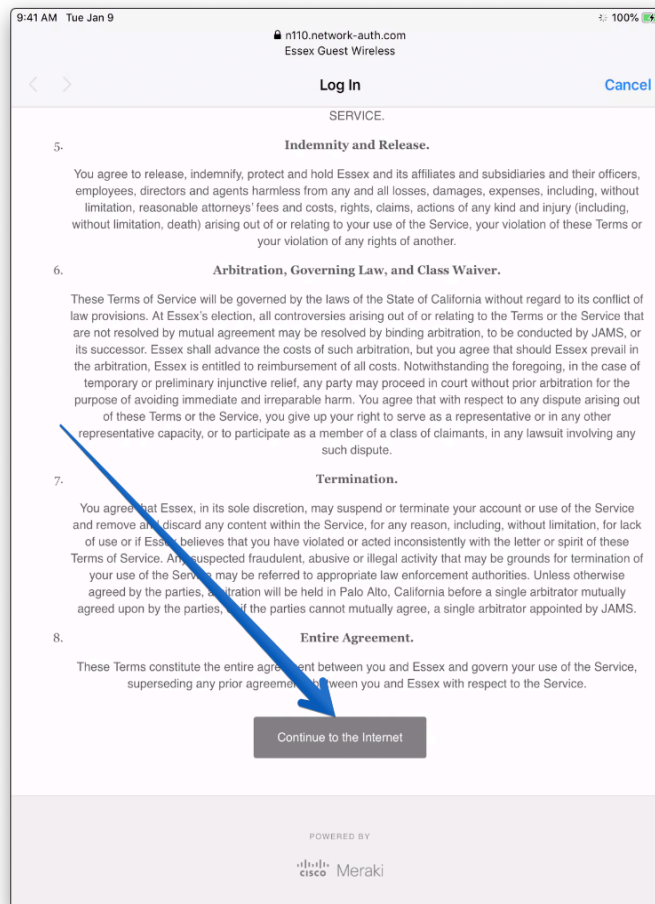

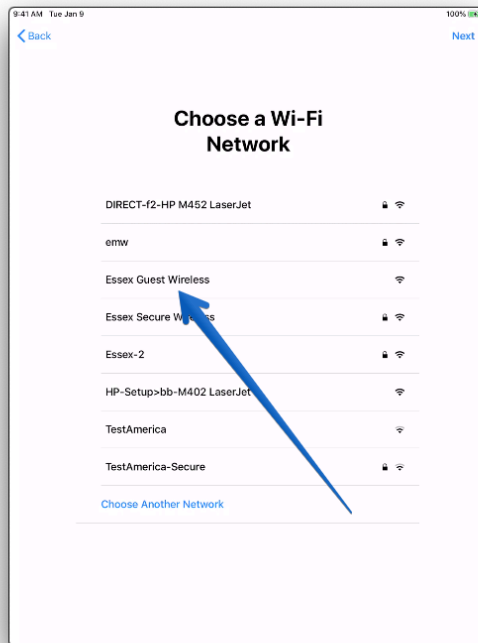

Touch English to choose it as the language. Then Select United States as the country

If you see the image below, touch “Set up Manually” at the bottom of the screen.

Now the iPad needs connected to the internet so it can get activated. Touch “Essex Guest Wireless”, then scroll to the bottom and touch the “Continue to Internet” button.

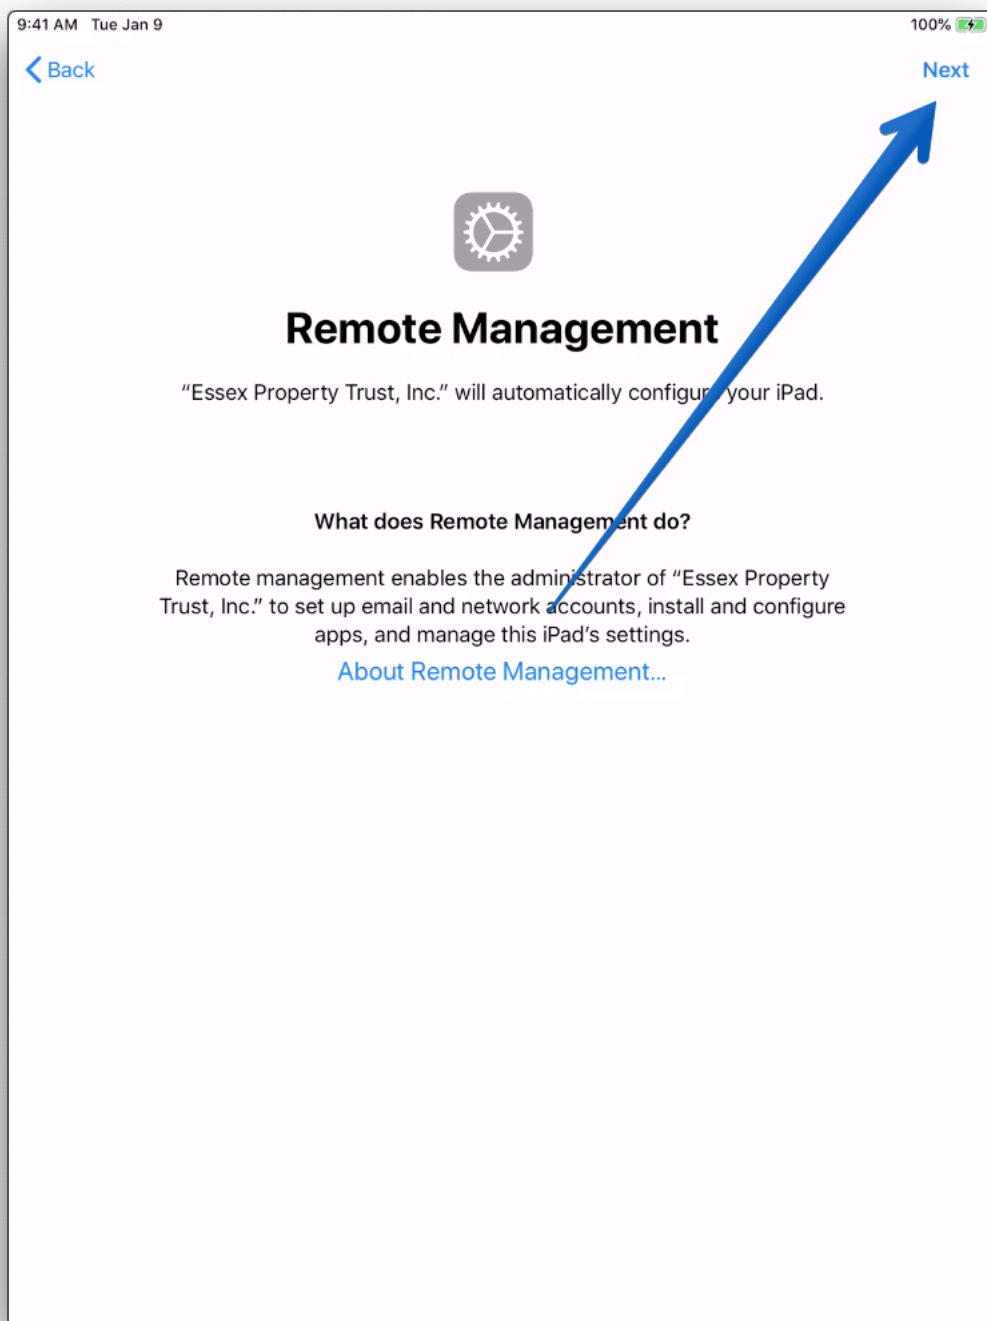

Touch the “Done” button.

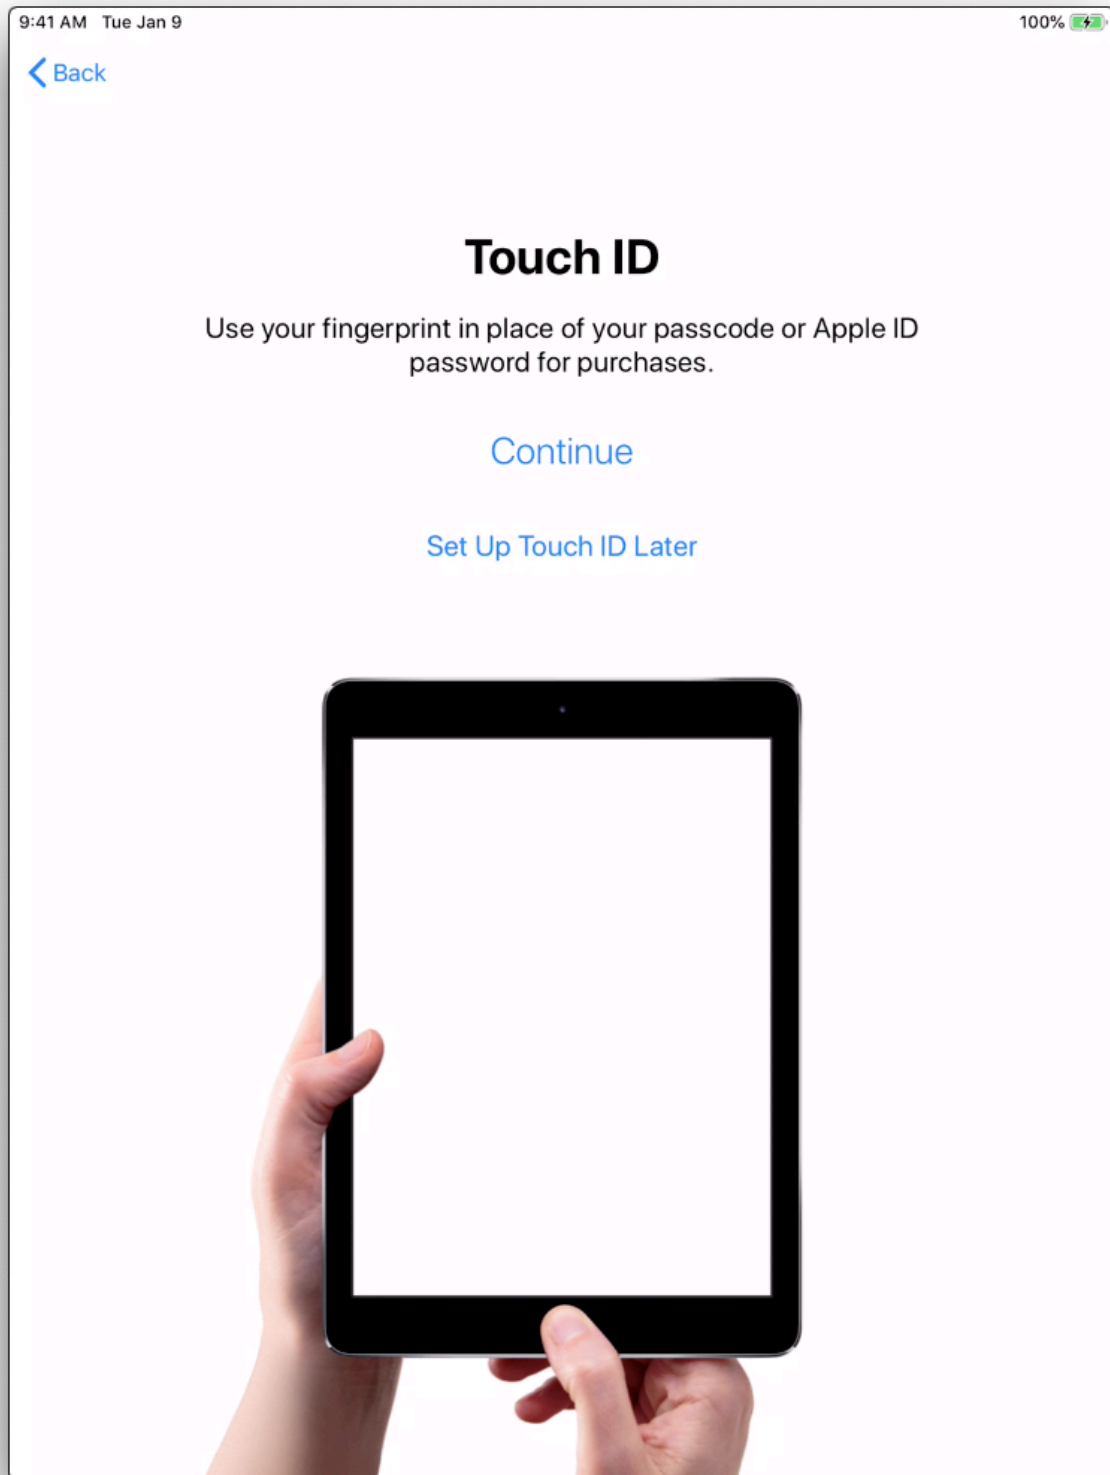

The iPad will now begin retrieving some configuration setup by the Essex IT department.

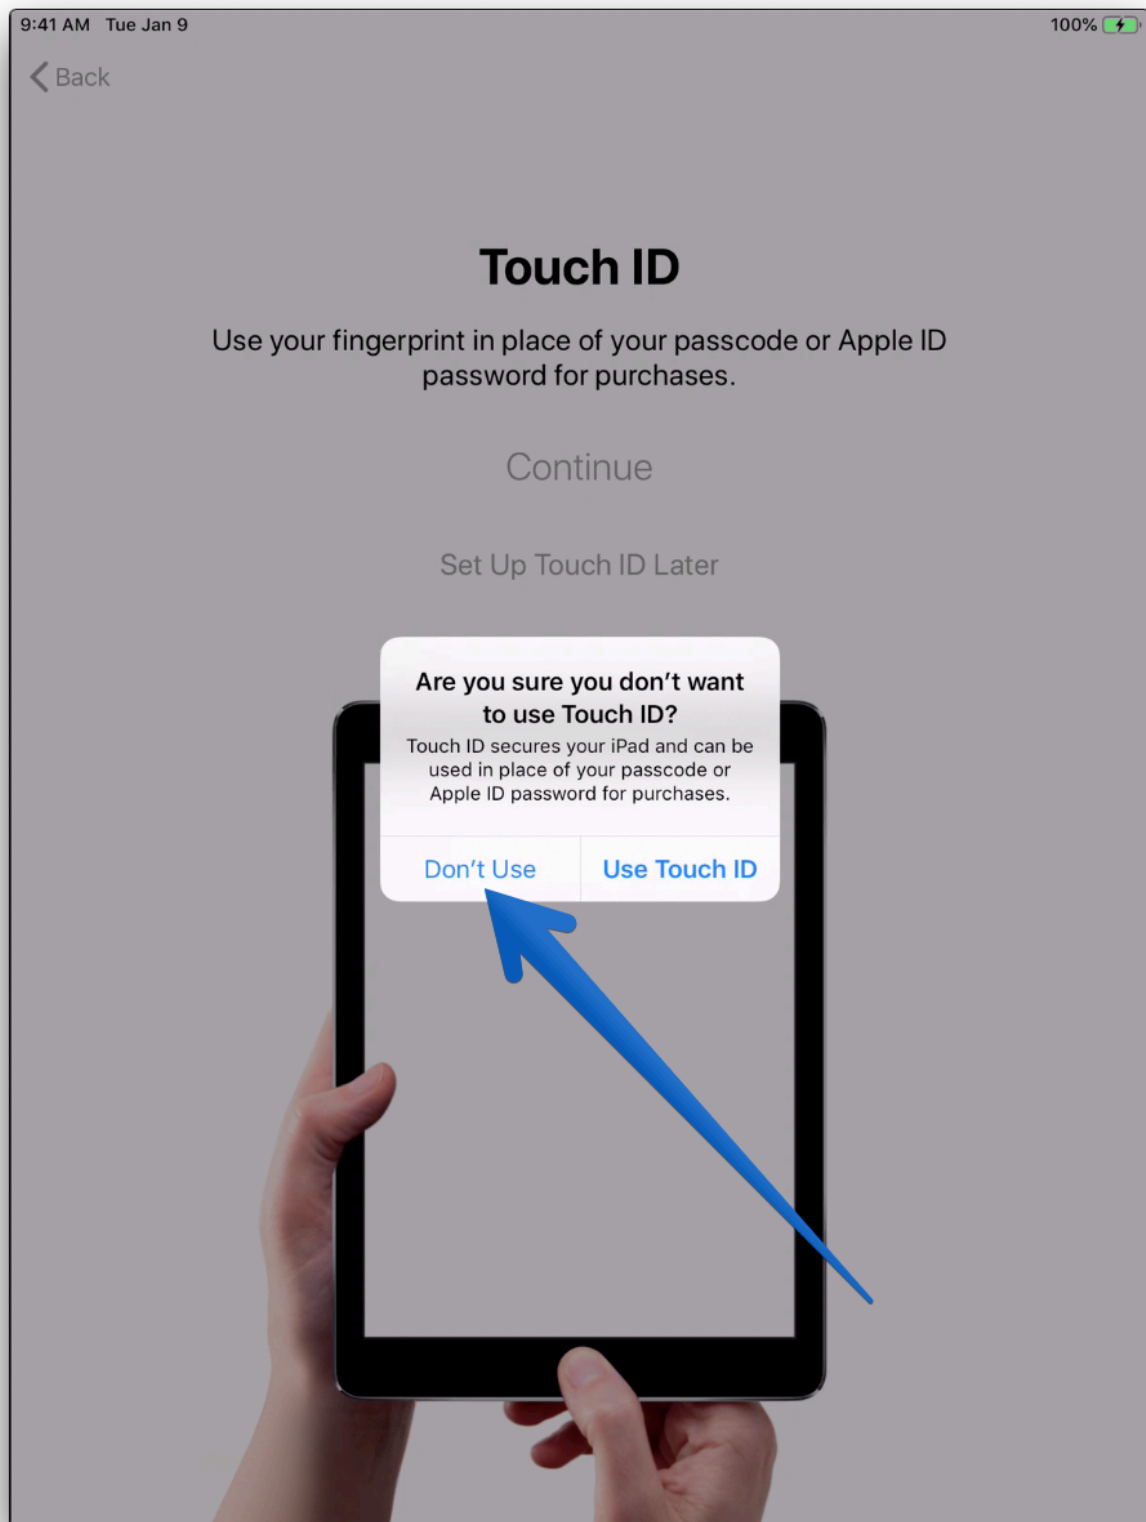

When you see this screen, touch "Next."

If you are asked to setup “Touch ID”, you can do that if you’re the only one who uses the iPad. Otherwise if this is an iPad shared among different people just say “Set Up Touch ID Later.”

Confirm that you don't want to use Touch ID.

Setup a 6-digit passcode, be sure to tell the passcode to other co-workers if they use the iPad.

1. General.

(a) The software (including Boot ROM code, embedded software and third party software), documentation, interfaces, content, fonts and any data that came with your iOS Device ("Original iOS Software"), as may be updated or replaced by feature enhancements, software updates or system restore software provided by Apple ("iOS Software Updates"), whether in read only memory, on any other media or in any other form (the Original iOS Software and iOS Software Updates are collectively referred to as the "iOS Software") are licensed, not sold, to you by Apple Inc. ("Apple") for use only under the terms of this License. Apple and its licensors retain ownership of the iOS Software itself and reserve all rights not expressly granted to you. You agree that the terms of this License will apply to any Apple-branded app that may be built-in on your iOS Device, unless such app is accompanied by a separate license, in which case you agree that the terms of that license will govern your use of that app.

(b) Apple, at its discretion, may make available future iOS Software Updates. The iOS Software Updates, if any, may not necessarily include all existing software features or new features that Apple releases for newer or other models of iOS Devices. The terms of this License will govern any iOS Software Updates provided by Apple, unless such iOS Software Update is accompanied by a separate license, in which case you agree that the terms of that license will govern.

(c) If you use the express setup feature to set up a new iOS Device based on your existing iOS Device, you agree that the terms of this License will govern your use of the iOS Software on your new iOS Device, unless it is accompanied by a separate license, in which case you agree that the terms of that license will govern your use of that iOS Software. Your iOS Device will periodically check with Apple for iOS Software Updates. If an update is available, the update may automatically download and install onto your iOS Device and, if applicable, your peripheral devices. **By using the Apple Software, you agree that Apple may download and install automatic iOS Software Updates onto your iOS Device and your peripheral devices.** You can turn off automatic updates altogether at any time by changing the Automatic Update settings found within Settings > General > Software Update.

2. Permitted License Uses and Restrictions.

(a) Subject to the terms and conditions of this License, you are granted a limited non-exclusive license to use the iOS Software on a single Apple-branded iOS Device. Except as permitted in Section 2(b) below, and unless as provided in a separate agreement between you and Apple, this License does not allow the iOS Software to exist on more than one Apple-branded iOS Device at a time, and you may not distribute or make the iOS Software available over a network where it could be used by multiple devices at the same time. This License does not grant you any rights to use Apple proprietary interfaces and other intellectual property in the design, development, manufacture, licensing or distribution of third party devices and accessories, or third party software applications, for use with iOS Devices. Some of those rights are available under separate licenses from Apple. Touch "Continue."

Touch "Get Started."

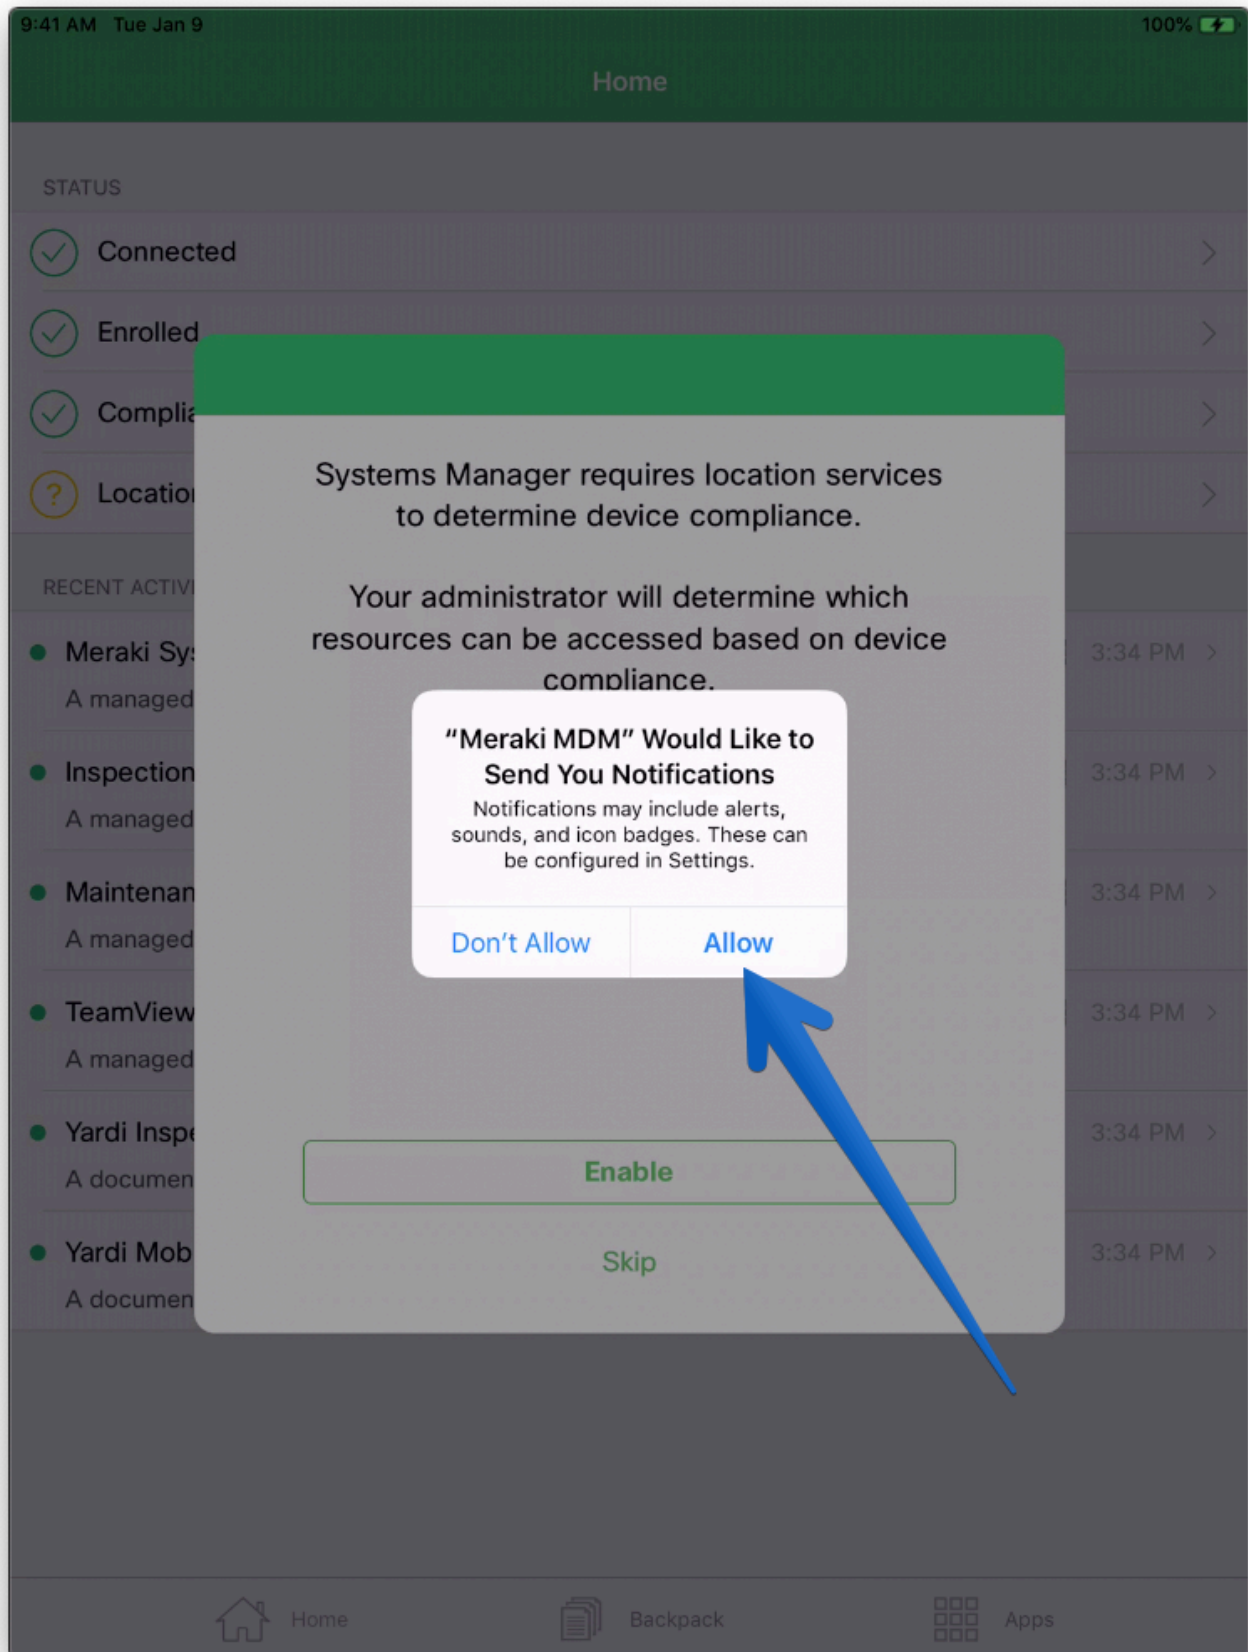

A button may come up that says your Home Screen is being edited. This is normal, the specified apps for maintenance staff are being automatically installed. Touch “Dismiss.”

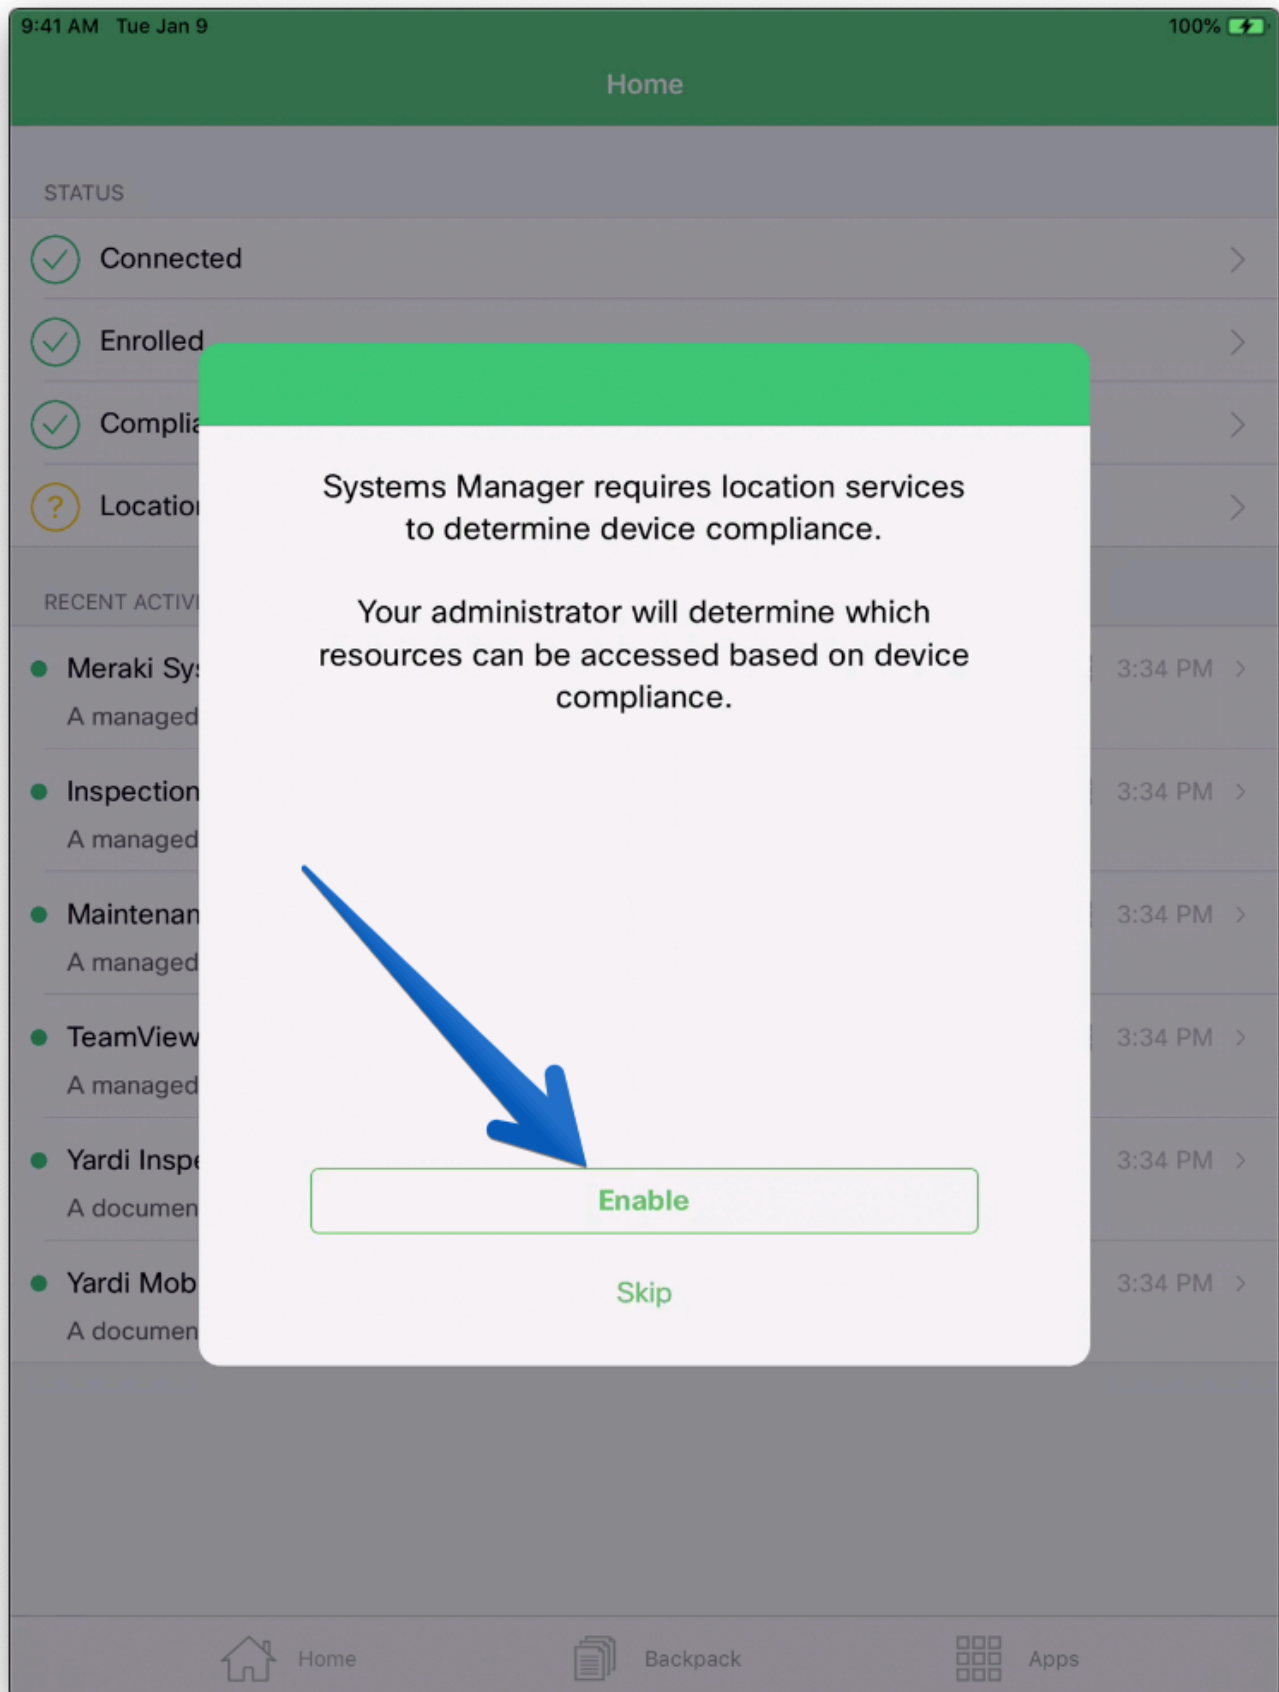

Ok, we're at the home page of the iPad! The first thing to do is open the Meraki MDM app so we can make sure it has the right permissions to do its job.

Touch "Allow"

Then touch "Enable."

Then finally, "Always Allow."

You should see these 4 green checkmarks on the app. So this app is now good to go.

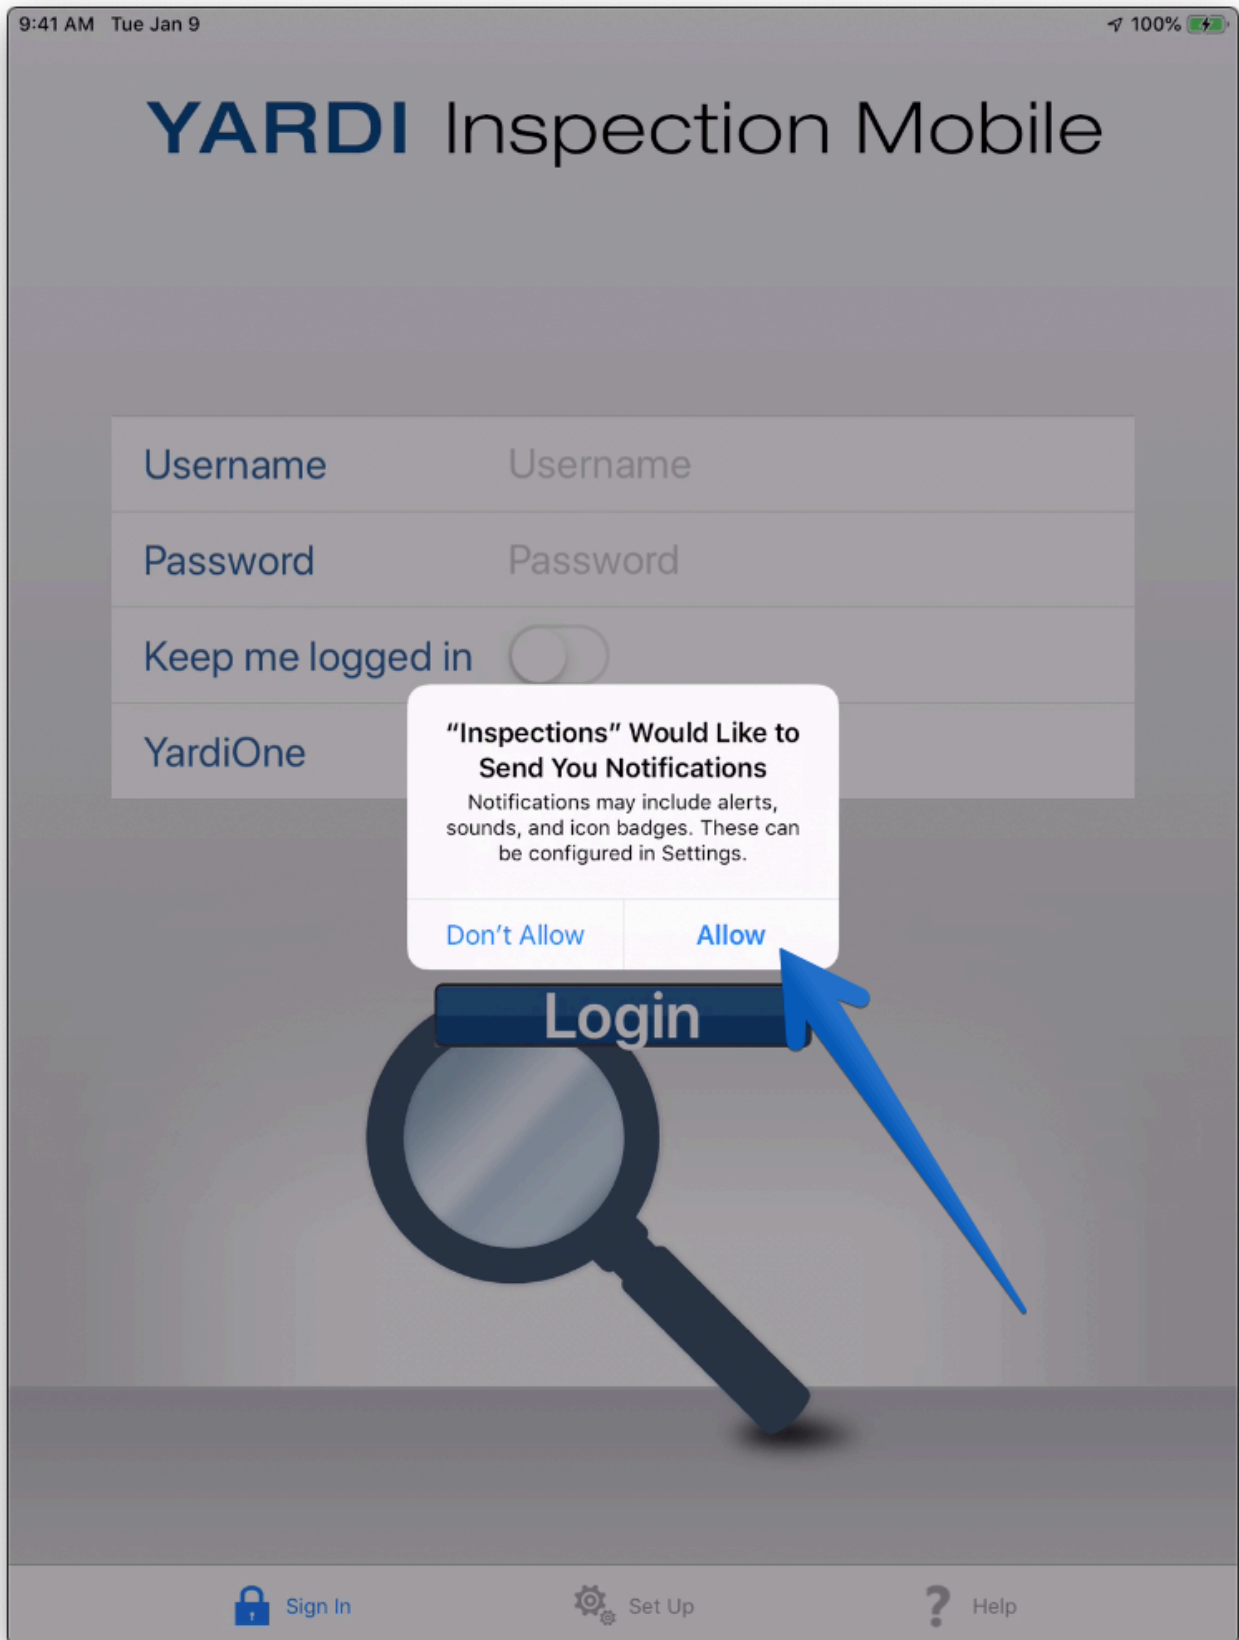

Press the “Home” button on the iPad to return to the home screen.

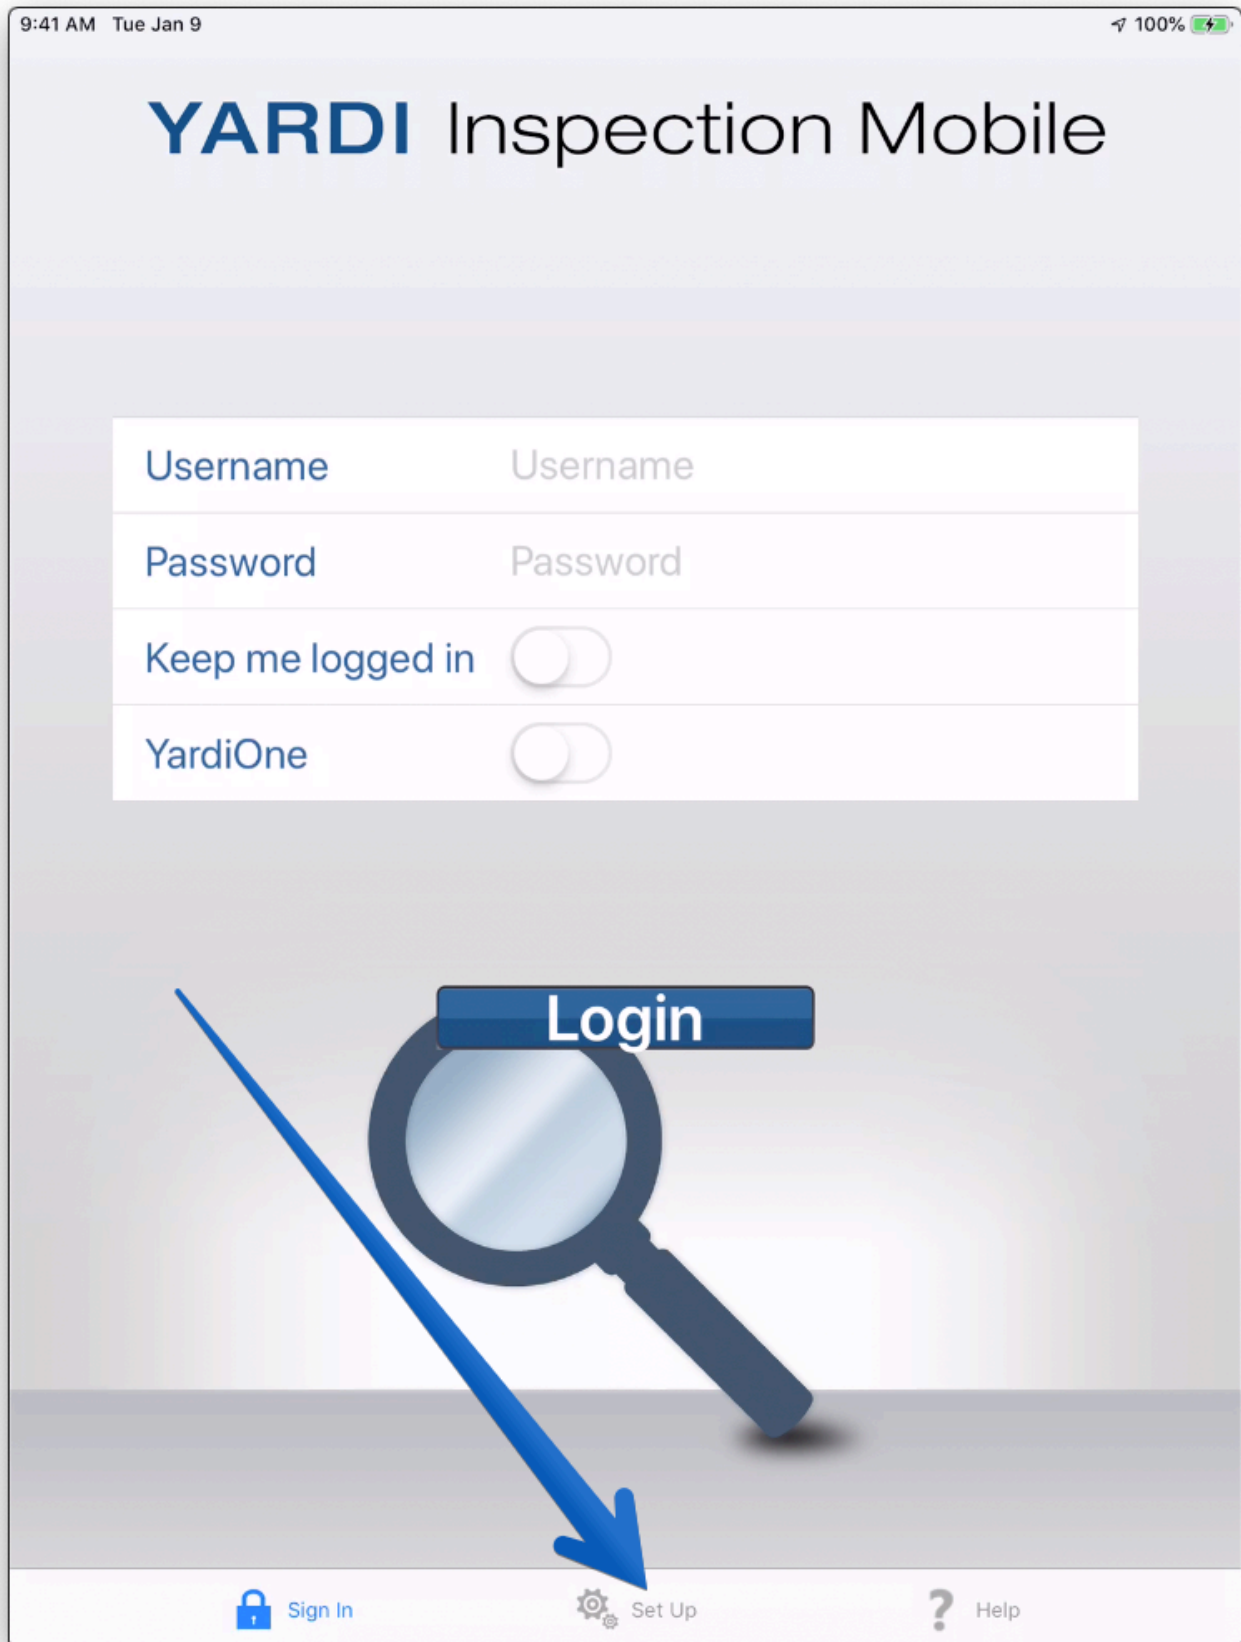

Now we need to setup the Inspections app, and the Maintenance app. Let’s open the Inspections app first.

Touch Allow if you see a pop up on the app.

Touch the "Set Up" button at the bottom of the screen.

Then, touch the “Scan” button, and the camera will open. Allow the camera its permission and then hold the camera image over the QR code below.
